DETAILED ACTION

1. In response to the communications dated 10/28/2009, claims 1-3 and 5-25 are active in this application and in the condition for allowance.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114 was filed in this application after a decision by the Board of Patent Appeals and Interferences, but before the filing of a Notice of Appeal to the Court of Appeals for the Federal Circuit or the commencement of a civil action. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 10/28/2009 has been entered.

Examiner's Amendment

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mark E. Scott, Reg. No. 43,100 on November 06, 2009.

The application has been amended as follows:

Claim 1. (Currently amended) A computer-readable storage medium storing a program that, when executed by a processor, causes the processor to:

receive a file from a client machine;

create metadata regarding the file, and wherein the metadata defines at least in part data management preferences for the file;

implement, autonomously of a user of the file, storage strategies for the file based on the metadata and in a namespace different than the client machine namespace; and

store the file on one or more storage devices selected by a software agent based on the metadata.

Claim 19. (Currently amended) A computing system comprising:

a first means for executing programs;

a second means for executing programs coupled to the first means for executing;

a plurality of means for storing programs and data coupled to the second means for executing;

wherein the first means for executing communicates files to the second means for executing for storage on at least one of the plurality means for storing, wherein the second means for ~~storing~~ executing to be a network storage device operating in a file structure of the first means for executing; and

wherein program executing on the second means for executing selects on which of the plurality of means for storing to store the files on a file-by-file basis based on storage characteristic preferences supplied for each file, and wherein each file is stored under a globally unique name in a global namespace of the plurality of means for storing.

Allowable subject matter

4. The following is an examiner's statement of reason for allowance:

None of the references of record Cannon (US 5,983,239), Howard (US 6,519,612), or Mikesell (US 2004/0153479) teaches or suggests the claimed (Claim 1) invention having, in addition to the other limitations in the claims, the limitation of "implement, autonomously of a user of the file, storage strategies for the file based on the metadata and in a namespace different than the client machine namespace."

None of the references of record Cannon (US 5,983,239), Howard (US 6,519,612), or Mikesell (US 2004/0153479) teaches or suggests the claimed (Claim 8 and 19) invention having, in addition to the other limitations in the claims, the limitation of "wherein the server selects on which of the plurality of storage devices to store the files on a file-by-file basis based on storage characteristic preferences supplied for each file, and wherein each file is stored under a globally unique name in a global namespace of the server."

None of the references of record Cannon (US 5,983,239), Howard (US 6,519,612), or Mikesell (US 2004/0153479) teaches or suggests the claimed (Claim 15) invention having, in addition to the other limitations in the claims, the limitation of "the server stores the file on at least one of the first and second storage devices in a global namespace different than the user namespace, the selection of the storage location made by the server based on the attributes of the storage devices and storage preferences for the file" where the first storage device and the second storage device are distinct from the server and from each other.

Dependent claims are allowable because they depend from base claim.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".

Conclusion

6. A shortened statutory period for response to this action is set to expire 3 (three) months and 0 (zero) day from the day of this letter. Failure to respond within the period for response will cause the application to become abandoned (see M.P.E.P 710.02(b)).

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Patel US 2003/0135514 discloses systems and methods for providing a distributed file system incorporating a virtual hot spare.

Archibald US Patent No. 6,918,006 discloses system and method to coordinate data storage device management operations in a data storage subsystem.

Rajan US Patent No. 7,107,385 discloses storage virtualization by layering virtual disk objects on a file system.
